Introduction to Coronary Heart Disease

Date: 3rd July 2026
Times: 0930-1530
Venue: Zoom Online Platform
Places available: 15
Fee/s: NFp Members £105 / Non-Members £150

This workshop is suitable for: Nurses & other Registered HCPs.

Introduction

Coronary heart disease remains a major challenge in primary care, and nurses are central to early recognition, effective management, and long-term patient support. This workshop offers a clear, practical overview of what's happening inside the arteries, how risk factors drive disease progression, and why rapid assessment is so critical. You'll explore evidence-based treatment approaches, the essentials of primary care monitoring, and the skills needed to empower patients in their self-management. Through real-world case studies and practical application, this session will strengthen your confidence and enhance the quality of cardiovascular care you deliver every day

Learning Outcomes / Workshop Objectives

- ♥ To be familiar with the pathophysiology of atheroma and coronary heart disease
- ♥ To appreciate the importance of rapid assessment for patients presenting with signs and symptoms of coronary heart disease
- ♥ To be familiar with medium and long-term management strategies for coronary heart disease
- ♥ To recognise the importance of supporting self-management strategies

Course Content

- ♥ The Big Problem: Cardiovascular disease in the UK today
- ♥ Understanding what's happening in the arteries
- ♥ Understanding how the cardiovascular risk factors contribute to disease progression
- ♥ Basic mechanisms of treatments
- ♥ What's required in Primary Care: Registers & Annual Review
- ♥ Clinical case studies
- ♥ Application in practice
