Managing Risk Assessments

Date: 5th February 2024
Times: 0900 – 1630
Venue: Microsoft Teams Online Platform

Places available: 12

Fees:	Members	£95
	Non Members	£140

This workshop is suitable for: For all staff to have a thorough understanding of effective accident investigation.

Introduction

At the heart of all effective health and safety policies you will find risk assessments. These are necessary because, when carried out properly, risk assessments can help companies turn sites with hazards into safe workplace environments.

There are five steps to a risk assessment process that involve identifying any hazards that could cause accidents, injuries or ill-health. The level of risk and likelihood of incidents occurring also needs to be analysed, with effective control measures implemented and monitored. Risk assessment findings also need to be communicated across all levels of the company. These steps can help companies in all industries make sure their work environment is safe and can protect people from harm. In this training we will explore these steps and ensure that when we conduct our own risk assessments, we are doing so with helicopter vision.

Aims & Objectives

For managers, leaders, trainers, health and safety officers and anyone involved in health and safety training and/or procedures. This risk assessment training course will give participants the necessary information and skills to enable them to carry out a thorough and effective accident investigation.

Learning Outcomes

By the end of this session candidates should be able to:

- Delegates will have an understanding of Health & Safety Law
- Everyone shall be able to identify hazards, risks & control measures
- Understanding of Safety Signs & Safe Systems of Work (SSOW)
- A clearer understanding of accidents and incidents
- Assess the risks in the workplace
- Create self-certified action plans
